

LETTER PLATES

Letter plate set for use on FD30 and FD60 fire check doors.
Black nylon surround and through the door sleeve, with integral bush smoke/draught seal, and inner and outer sprung aluminium flaps.
The two sides of the set are fixed back to back, to provide a smart letter plate inside and out with continuous, through the door sleeve. An intumescent section wrapped around the sleeve will close the aperture through the door in a fire situation.
To suit door thickness 40-75mm
