

SPILLER ARCHITECTURAL IRONMONGERY

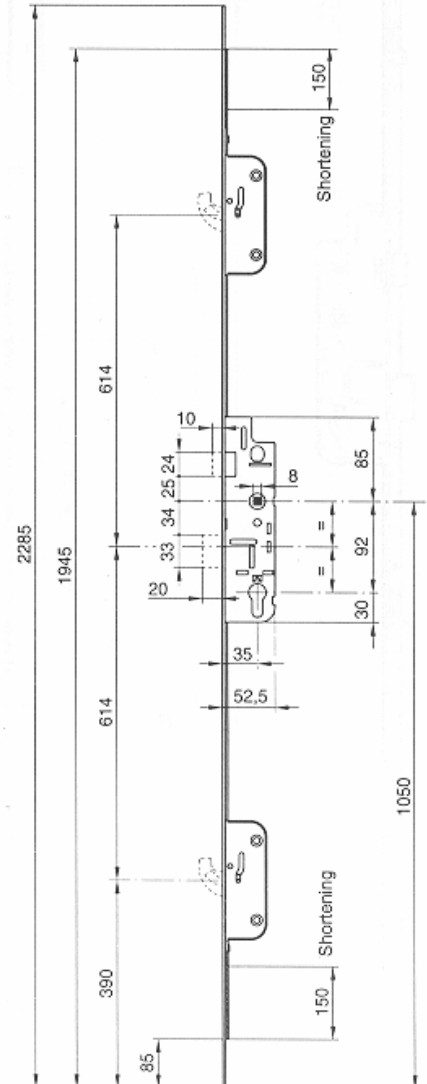

LOCKING DOOR ESPAGNOLETTES

An economical mortice fixed, cylinder locking, multi-point espagnolette bolt. Providing two, 23mm throw "Rhinobolt" steel hook deadbolts and one 20mm throw square deadbolt, with the option of additional top and bottom vertical shoot bolts. Zinc plated and passivated steel construction, 8mm sprung follower for lever furniture. Drilled for bolt through levers and escutcheons @ 38mm C/C.. Lock case prepared to accept a standard 17mm Euro-profile cylinder, at 92mm cylinder/follower centres. Suitable for unsprung furniture. Supplied with strike plates to suit 44mm thick timber doors.

Lever/lever function: The reversible latch bolt is operated by the lever furniture on both sides of the door at all times, the three deadbolts are thrown by lifting the lever handle, and may then be locked by operation of the cylinder. Once unlocked the deadbolts are withdrawn by a downward action of the levers.

Night latch function: From outside; latch bolt operated by key only, deadbolts thrown and withdrawn by the lever handles, once thrown the deadbolts can be locked with the key. From inside; latch bolt operated by lever handle. Deadbolts thrown and withdrawn by the lever handles, once thrown the deadbolts can be locked with the cylinder.

May be used with either a double cylinder, or cylinder and thumb turn (supplied separately). If the additional vertical shoot bolts are fitted these too are operated simultaneously with the deadbolts.

Description:	Backset	Overall	Code:
Lever/lever function Rhino espagnolette	35mm	53mm	WB7203,BZ
Lever/lever function Rhino espagnolette	45mm	63mm	WB7205,BZ
Top and bottom shoot pack c/w sockets			WB7208,BZ
