

**HEAVY DUTY CYLINDER MORTICE LOCKS, SERIES LB09**

A range of heavy duty cylinder mortice lock cases, designed to accept both 17mm Euro-profile and UK oval shaped cylinders. The spindle gripping follower is heavy sprung for use with unsprung lever furniture. The guided latchbolt is fully reversible without opening the lock case. The narrow style forend allows the fitting of a continuous smoke seal around the door. The lock has successfully completed a four hour fire test. The deadbolt is double throw for additional security, with 20mm full projection. Stainless steel forend and strike plate. The latchbolt can be operated by either lever furniture or the cylinder on sashlocks. The lock case is pierced for bolt through fixed levers and escutcheons. Can be used with single, double or cylinder and thumb turn combinations.
