

WINDOW FASTENERS

Over centre window cam openers, for use on top hung outward opening casement windows. Provide positive securing of the window in open and closed positions, with window opening restricted to 145mm (Dependant on frame configuration)
 May be used singly, or tandem linked in pairs.
 Satin silver anodised finished extruded aluminium.

Tandem link rods are available in range of lengths to suit various window widths. When using in pairs sets of end caps and fixing screws will be required (ordered as separate component)
